GREEN-LINE

SUSTAINABLE WORKWEAR

Three different collections made of high-quality fabrics, recycled polyester and Supporting Fairtrade Cotton show us what excellence at the workplace looks like.

The new **GREEN-Line** offers responsible workwear with modern blended fabrics made of 65% recycled polyester and 35% Supporting Fairtrade Cotton.

The recycled polyester fibers are obtained from PET bottles in a much more energy-saving way than normal polyester, without compromising the fabric's quality in any way. One piece of new clothing is made from 25 old PET bottles.
